

## Hadley School – a lesson in higher learning

<b>Project Name:</b>	<b>Hadley Learning Community</b>
<b>Location:</b>	<b>Telford, Shropshire</b>
<b>Client:</b>	<b>Telford and Wrekin Borough Council</b>
<b>Product:</b>	<b>Rhepanol fk and Rhepanol hg</b>
<b>Size:</b>	<b>14,000 sq m</b>
<b>Architect:</b>	<b>Aedas AHR</b>

Rhepanol fk and hg provided a solution for lost green space on one of the UK's largest Private Finance Initiatives, Hadley Learning Community Complex.

The 16-hectare, state-of-the art education centre, which brings together nursery, primary, secondary and community education facilities, is now a Telford landmark.

Some 14,000 sq m of its high quality flagship membranes Rhepanol fk and Rhepanol hg for the flat roof areas of the mammoth two-storey project, where one of the major priorities was keeping the roof maintenance free for the maximum possible length of time.

Nine roof areas were fitted with 12,000 sq m of Rhepanol fk while an additional 2,000 sq m of Rhepanol hg were installed to two featured green roofs, to keep them watertight and root-resistant. These were made up of Rhepanol hg, a drainage layer, soil substrate and a planted layer of sedum.
