

**NEW RIBA CPD Seminar:
Roof Refurbishment: Choosing the Best Solution**

Why attend this seminar?

This seminar sets out a step by step process to help the specifier arrive at the best solution for roof refurbishment; what to expect from a roof survey, how the condition of the roof can impact design decisions and how to find the best solution for your client. It will also look at the problems caused by the misdiagnosis of interstitial condensation. Examples of common problems experienced in roof refurbishment are illustrated through project examples.

The CPD also addresses common problems with detailing, compatibility and interfaces, and how to avoid them. There's a checklist of what manufacturer support to expect, both technically and on site, plus advice on compliance with British Standards and Codes of Practice.

What will we learn about Roof Specification and Design?

The new seminar sets out a step by step process to help you with choosing the best product for your refurbishment project. We look at what should be included in the roof survey, how the condition of the roof will influence the design and finding the right solution for your roof.

Along the way, we also:

1. Identify the common problems faced when refurbishing a roof and how to avoid them.
2. Explore the three stages in roof refurbishment; roof survey, design considerations and finding the correct roofing solution.
3. Look at the problems caused through the misdiagnosis of interstitial condensation.
4. Clarify when to specify which type of roofing system for your roof.
5. Best practice in roof refurbishment.
6. Set out a checklist of what you should expect in support from manufacturers, both at a technical stage and on site.
7. Help you comply with British Standards and Codes of Practice, and
8. Provide sources of further information and advice.

The seminar is 60 minutes long including questions, and qualifies for double points on your CPD record.

About SIG Design & Technology

SIG Design & Technology is part of SIG Roofing, a leading division of SIG plc, a FTSE 250 listed company and the UK's market leading specialist supplier to professionals in the building and construction industry. We design and supply flat roofing solutions including green roofing, zinc, copper and stainless steel roofing and cladding and pitched roof coverings including natural slate and clay tiles. We have put together an 8-step guide to identify the challenges and ensure that a roof's design meets a building's requirements. Called #PerfectRoof, the eight steps follow the process from product selection and design expertise through to full guarantees and planned maintenance. Our know-how is just part of the service that is provided absolutely free to customers.
