

## SPECTRATEx

### PRODUCT INFORMATION

Spectratex geotextiles are a range of non-woven polyester geotextile isolation and protection layers. Used to protect the Spectraplan or Armourplan waterproofing membrane on ballasted or green roof build ups and can be used as a separation layer between PVC membranes and incompatible substrates such as existing bituminous membrane roofs or polystyrene thermal insulation boards.

The Spectratex geotextiles are available in 3 grades – 300gsm, 500gsm, and 800gsm. Heavier grades should be utilised in more onerous situations such as when overlaying an existing bituminous roof where it's impractical to remove all of the chippings.

The Spectratex geotextiles are installed loose laid with a 150mm side and end overlap.

### FEATURES & BENEFITS

- Effective Separation & Protection Layer
- Good UV resistance and durability
- Good mechanical properties and product performance
- Efficient and safe installation

<b>Description</b>	Polyester Separation/Protection Geotextile
<b>Weight (GSM)</b>	300 / 500 / 800
<b>Length</b>	50m / 25m
<b>Width</b>	2m
<b>Colour</b>	White
<b>Material</b>	Polyester

### SPECTRATEx ROLL SIZES

Product	Width	Length	Item Number
<b>Spectratex 300</b>	2m	50m	05490300
<b>Spectratex 500</b>	2m	25m	05490500
<b>Spectratex 800</b>	2m	25m	05490800
