

**NEW RIBA CPD Seminar:  
Liquid Waterproofing: Choosing the Best Solution**

**Why attend this seminar?**

This seminar seeks to build a useful structure to the roof specification and design process to ensure maximum longevity when specifying liquid waterproofing systems. The seminar sets out a step by step process to help you arrive at the best solution in any particular circumstance. We look at how to establish the client's brief, how to ensure compliance, and how to make the right cost decisions. Examples of choosing the best liquid product for your project are illustrated through project examples.

The CPD also addresses common problems with detailing, compatibility and interfaces, and how to avoid them. There's a checklist of what manufacturer support to expect, both technically and on site, plus advice on compliance with British Standards and Codes of Practice.

**What will we learn about Liquid Waterproofing?**

The new seminar sets out a step by step process to help you with choosing the best liquid waterproofing product for your project. We look at differences between the main types of liquid waterproofing solutions, how the condition of the roof will influence the design and finding the right solution for your roof.

Along the way, we also:

1. Introduce the range of liquid waterproofing products available, outlining their benefits and looking at typical scenarios;
2. Look at common problems with detailing, compatibility and interfaces, and how you can avoid them;
3. Set out a checklist of what you should expect in support from manufacturers, both at a technical stage and on site;
4. Help you comply with British Standards and Codes of Practice, and
5. Provide sources of further information and advice. The seminar is 60 minutes long including questions, and qualifies for double points on your CPD record.

**About SIG Design & Technology**

*SIG Design & Technology is part of SIG Roofing, a leading division of SIG plc, a FTSE 250 listed company and the UK's market leading specialist supplier to professionals in the building and construction industry. We design and supply flat roofing solutions including green roofing, zinc, copper and stainless steel roofing and cladding and pitched roof coverings including natural slate and clay tiles. We have put together an 8-step guide to identify the challenges and ensure that a roof's design meets a building's requirements. Called #PerfectRoof, the eight steps follow the process from product selection and design expertise through to full guarantees and planned maintenance. Our know-how is just part of the service that is provided absolutely free to customers.*
