Warranty

System Advantages

SURE-SEAL SYSTEM ADVANTAGES

Simple, clean, fast, safe and reliable are just a few of the words said about the benefits of EPDM by roofing contractors.

- **Full installation support**
- **Wide sheets reduce install time - up to 15.25m**
- **Fully adhered installation**
- **Ideal for complete renewal or new build projects**
- **Does not become brittle or degrade with age**
- **Environmentally friendly**
- **Low-life cycle costs**
- **No heat or welding during installation**
- **Low odour and noise, making it ideal for re-roofing occupied buildings**
- **Easily seamed to other materials & roofing systems**
- **Full range of pressure-sensitive accessories**

CONTRACTOR SUPPORT AND TRAINING

IN-HOUSE TRAINING

Full hands-on, practical training at our dedicated training centres including seaming options, terminations, finishing, penetrations and much more.

ON-SITE TRAINING

To complement the in-house training, our experienced technical team will work with you on your roofing projects to ensure all projects meet our warranty standards and specifications.

ON-GOING SUPPORT

Direct contact with SIG Design & Technology ensures your questions are answered instantly by our technical staff, who have all been roofers and understand your needs. With site visits anywhere in the country, we will be there when you need us.

EPDM PRESSURE-SENSITIVE ACCESSORIES

Pressure-sensitive accessories save time and money by boosting productivity on the rooftop.
