

# Pedestals & Support Pads

For Roofing, Paving and Decking

## Wallbarn and SIG Design & Technology

SIG Design & Technology has partnered with Wallbarn to provide a comprehensive range of pedestals and support pads for suspended paving and decking systems on structural decks.

### Help create the perfect solution for rooftop living

Our range of pedestals help improve the performance of the building by allowing proper drainage beneath the upper surface, ventilating the structure and preventing localised flooding.

Pedestals and support pads are used for constructing hard landscaping areas on terraces, balconies, ballasted flat roofs and podium decks.

They improve drainage by lifting the slab or decking off the waterproofed surface.

No mechanical fixings are required and the membrane is not compromised.

The open joint design means surface ponding does not occur, reducing slip hazards.

They are the fast, easy way to build the highest quality pedestrian surfaces, improving the appearance and performance of structural surfaces and optimising the building footprint.

## Fixed height

Specially designed for restricted height thresholds to raise paving or decking off the surface.

- Cost-effective entry-level support pads
- Separate paving or decking from base structure
- Protect surface beneath
- Ultra-low height thresholds
- Fast and easy installation
- Available in plastic, PVC or natural rubber compound
- Shims, slope correctors and other accessories available

## Adjustable pedestal (Universal)

A wide and versatile range of adjustable pedestals. Adjust height telescopically to achieve completely flat upper surface, even whilst slab or joist is in place.

- Ideal for paving slabs and timber decking
- Suspended system
- Millimetre precise adjustability
- Superior quality virgin fibre polypropylene
- Weight tolerance over 1 tonne
- Withstand sub-zero temperatures

## Self leveling pedestals (Balance)

Self-levelling headpiece creates an even upper surface.

- Ideal for paving slabs and timber decking
- Corrects slopes
- Accommodates blemishes and ridges in subdeck
- Adjusts for differences in slab thickness
- Fully adjustable telescopic stem
- Superior quality virgin fibre polypropylene
- Weight tolerance over 1 tonne

## About SIG Design & Technology

SIG Design & Technology is a part of SIG Roofing, a leading division of SIG plc, a FTSE listed company and the UK's market leading specialist supplier to professionals in the building and construction industry.

SIG Design & Technology has put together an 8-step guide to identify the challenges and ensure that a roof's design meets a building's requirements.

Called *#PerfectRoof*, the eight steps follow the process from product selection and design expertise through to full guarantees and planned maintenance. Its know-how is just part of the service that is provided absolutely free to customers.

## Take the risk out of roof design...

### ■ The right products for your project to meet requirements for:

- Carbon capture
- Insulation
- Roof longevity
- Energy generation
- Design covered by our PI insurance
- Genuine choice of waterproofing
- Part of a FTSE 250 company
